

Project

The Chesterfield, Bristol –
Places Protection

Product Used

Class 'O' Fire Rated Impact
Protection Sheet

Client

Nuffield Health Bristol Hospital,
The Chesterfield

Market Sector

Private Healthcare

What the client says

"It was evident that we needed to do something to protect the walls of the hospital not only for aesthetic reasons but also to safeguard patients from infection, Intastop was able to provide protection in a variety of colours and with the added benefits of anti bacterial properties too. We are delighted with the visual appearance and the practicality of the wall protection from Intastop and are already looking at other areas in the hospital that could benefit from this type of investment too."

Gerri Morgan Supplies and Facilities Manager Nuffield Health Bristol Hospital, The Chesterfield

"We wouldn't hesitate to recommend this product to other clients and found it easy to cut and fit during the refurbishment programme. Together, with a special hard rigid adhesive that we had experience of using, we are confident that the product will provide superb protection to walls and patients."

The Project Brief

Nuffield Health Bristol Hospital, The Chesterfield – commissioned wall protection from manufacturer Intastop Ltd after its walls in theatre corridors and waiting areas were suffering from high levels of unsightly and unhygienic impact damage.

The Solution

Intastop Impact Protection Sheet is not only suitable for walls, but also doors and cupboards, is Class 'O' fire rated and tested to BS476: Parts 6 & 7 giving facility managers complete peace of mind. Standard sheet thickness is 2mm although other thicknesses are available as is a range of colour options, edges can be chamfered and a 'H' joint trim can be utilised to ease installation. Furthermore, sheets can be cut onsite or can be ordered pre-cut to size to fulfil bespoke requirements

Typically, Impact Protection Sheet is used in areas of heavy traffic, as bed and chair rails and areas where easy cleaning is essential.

The newly established private hospital is reaping the benefits of additional investment in its infrastructure with the retro-fit of impact protection sheet to key areas within the building.

The Benefits

- Ensures staff and patient safety in the event of a fire by maintaining fire integrity allowing safe evacuation
- Reduces maintenance costs by protecting vulnerable door faces from costly damage occurring
- Maintains a clean safe environment ensuring staff and patient hygiene safety
- Achieves colour contrast for critical surfaces to assist with visually impaired staff and patients
- Enhances your surroundings with unique designs or signage
