

WEMBLEY CENTRE FOR HEALTH & CARE

PROJECT OVERVIEW

The project formed part of a full refurbishment of 16 restrooms within the Wembley Centre for Health & Care, part of the Whittington Health NHS Trust.

A key consideration was to find a solution that would help with cleaning and maintenance procedures and replace aged and unsightly ceramic tiles. The project had to give consideration to busy periods in the Health Centre which had to remain open to service users at all times.

SOLUTION

The Intastop i-Gienic+ smooth impact protection wall sheet, infused with Hygienilac, was chosen to cover full-height walls. Providing a durable, non-porous easy to clean surface, maintaining a hygienically clean and a safe and aesthetically pleasing environment for both patient and staff.

IN BRIEF

Sector: Healthcare
Contractor: Leverton Construction
Products: Smooth i-Gienic+
impact protection
sheet

Approx. value: £19,000

PRODUCT FEATURES

- Chemical resistant (acids, grease, etc).
- Class 'O' Fire Rated; tested to BS476 Parts 6 & 7
- Assists in meeting guidelines in BS8300:2001.

Intastop worked around our complicated schedule, including some night working. They offered experience and knowledge and were competitively priced.
