

CARE HOME REFURBISHMENT

IN BRIEF

Sector : Care Homes
Contractor: Intastop
Products: 800 Handrail, 1300 Wall Guard, Inpro Textured Sheet, Heavy Duty Corner Protection

CHALLENGES

- Work effectively alongside specialist care equipment
- Tight deadlines, offsite preparation and out-of-hours working

I compared three options but chose Intastop due to their level of guidance and support.

It's been a great experience all the way through. The products come in a wide range of colours, and the fitters were incredibly understanding and considerate of our residents' needs.

Matthew Bochenski, Company Director

PROJECT OVERVIEW

Pen-y-Bryn Care Home in Bagillt, North Wales, underwent a refurbishment project focused on improving protection and durability within a live care environment.

THE SOLUTION

A tailored combination of 800 Handrail, 1300 Wall Guard, InPro Textured Sheet, and InPro Heavy Duty Corner Protection was installed to provide robust, long-lasting protection throughout the facility. This combination offers strong impact resistance, easy maintenance, and a wide choice of colours to complement the interior environment. Installation was adapted to suit the live setting, with off-site preparation and out-of-hours working.

On-site expertise also allowed for bespoke adjustments, including an alternative solution for skirting protection to ensure compatibility with care equipment.
