

CYGNET PINDER HEALTH, BARNSELEY

IN BRIEF

Sector : Neuropsychiatric
Rehabilitation Hospital

Products: Ricochet® Flexible Wall
Protection

CHALLENGES

- Protect walls from damage caused by mobility equipment and furniture
- Find a durable, practical alternative to traditional wall protection.
- Create an attractive, therapeutic feel without making the setting look clinical.

The Ricochet material is definitely tougher and more durable than standard wallpaper. With its wipe-clean properties, it is going to help maintenance-wise and keep the wall looking new.

I've had a lot of positive comments since it's been installed. It looks great and brightens up the room.

Gary Wilcox
Maintenance Manager, Cygnet Pindar House

PROJECT OVERVIEW

Cygnet Pindar House is a specialist neuropsychiatric rehabilitation hospital providing care for adult men with acquired brain injuries and complex neurological conditions. They had a requirement for a wall finish that helped to create a welcoming, therapeutic environment but that also needed to be balanced with the practical demands of the specialist setting. A key aim of the project was to reduce ongoing maintenance costs while introducing a more therapeutic, hotel-like feel to the lounge area.

THE SOLUTION

Cygnet Pindar House selected Ricochet® Flexible Wall Protection. Designed to combine the appearance of a premium wall covering with a flexible yet more tough durability than that of traditional wallpaper, Ricochet provided an ideal alternative helping to transform the appearance of the room. Its wipe-clean surface will also make ongoing maintenance easier, helping the walls retain their fresh appearance for longer.
